

1

Read the text and answer the multiple-choice question by selecting the correct response. Only one response is correct.

The cost of mobile data varies significantly around the world, with some countries offering incredibly affordable rates while others charge exorbitant fees. According to recent studies, the global average cost of 1GB of mobile data is approximately \$2.59. However, there are vast discrepancies between regions and countries. For instance, India boasts the cheapest mobile data in the world, with an average cost of just \$0.16 per gigabyte. This incredibly low price is attributed to intense market competition and government policies that promote affordable access to the internet.

On the other hand, Zimbabwe stands as the most expensive country for mobile data, charging an average of \$43.75 for 1GB. This staggering cost is a result of various factors, including limited infrastructure, high operational costs, and a lack of competition. The affordability of mobile data has a profound impact on individuals and societies. In countries with cheap data, internet access is widespread, enabling people to connect with others, access information, and participate in the digital economy. Conversely, in regions with expensive data, internet usage is restricted, hindering social interaction, educational opportunities, and economic development.

Bridging the digital divide remains a crucial challenge for governments and policymakers worldwide. By addressing infrastructure limitations, fostering competition, and implementing supportive policies, countries can work towards ensuring affordable and equitable access to mobile data for all.

What is the central idea conveyed in this paragraph?

- (a) Zimbabwe boasts the most affordable mobile data in the world.
- (b) The affordability of mobile data plays a significant role in the development of societies.
- (c) The price of mobile data is consistent globally across different countries and regions.
- (d) The affordability of mobile data stems from expensive operating expenses and a lack of market competition.

Preparing for the PTE Reading section is now easier than ever with PTE Academy's free Multiple-choice, choose single answer PTE practice material. Combine that with our exceptional online and offline coaching, personalized study materials, and you'll have everything you need to excel in the PTE exam. **Don't wait any longer – Call 7207115105 today and let us help you soar to new heights in your PTE journey!**

2

Read the text and answer the multiple-choice question by selecting the correct response. Only one response is correct.

Long non-stop flights are becoming increasingly popular as airlines find ways to make them more comfortable and efficient. These flights can be up to 19 hours long, and they typically fly between major cities on opposite sides of the world.

There are a number of benefits to flying non-stop. First, it saves time. Passengers don't have to waste time going through security and customs twice, and they can avoid the hassle of connecting flights. Second, non-stop flights can be more comfortable. Airlines are investing in newer aircraft that are designed for long-haul flights, and they are offering amenities such as lie-flat seats, in-flight entertainment, and premium meals. However, there are also some challenges associated with long non-stop flights.

One challenge is that they can be very tiring for passengers. Sitting in an aeroplane seat for 19 hours can be uncomfortable, and it can lead to jet lag. Another challenge is that long non-stop flights can be more expensive than connecting flights. Airlines typically charge a premium for non-stop flights, and they may also have stricter baggage restrictions.

Which of the following most accurately summarizes the opinion of the author in the text?

- (a) Long non-stop flights offer several advantages over connecting flights, but they also come with some challenges.
- (b) Long non-stop flights are the only way to travel between major cities in a country.
- (c) Long non-stop flights are not worth the extra cost or hassle, as they are uncomfortable and can lead to jet lag.
- (d) Long non-stop flights are unsuitable for business travellers who need to save time.

Preparing for the PTE Reading section is now easier than ever with PTE Academy's free Multiple-choice, choose single answer PTE practice material. Combine that with our exceptional online and offline coaching, personalized study materials, and you'll have everything you need to excel in the PTE exam. **Don't wait any longer – Call 7207115105 today and let us help you soar to new heights in your PTE journey!**

3

Read the text and answer the multiple-choice question by selecting the correct response. Only one response is correct.

Smoking a pack of tobacco cigarettes per day can have a significant impact on your health. It is important to be aware of the risks before making the decision to smoke.

Smoking is the leading cause of preventable death in the United States, killing over 480,000 people each year. It is also a major risk factor for many other health problems, including heart disease, stroke, cancer, lung diseases, and diabetes.

Secondhand smoke is also dangerous, causing serious health problems in nonsmokers, including lung cancer, heart disease, and stroke.

Smoking is an addiction, and it can be difficult to quit. If you are thinking about quitting smoking, there are many resources available to help you. You can talk to your doctor, join a support group, or use online resources.

The benefits of quitting smoking are immediate and long-term. Within 20 minutes of quitting smoking, your heart rate and blood pressure begin to drop. Within a few days, your sense of smell and taste improve. And within a few months, your risk of heart attack decreases.

Quitting smoking is one of the best things you can do for your health. If you are ready to quit, there are many resources available to help you succeed.

Why does the speaker talk about the risks of smoking?

- (a) To persuade people to start smoking
- (b) To share their personal experience with smoking.
- (c) To advertise a new brand of cigarettes
- (d) To encourage people to quit smoking

Are you struggling with the Reading section's Multiple-choice, choose single answer task? PTE Academy understands the importance of solid preparation in mastering this challenging part of the exam. That's why we're offering you FREE Multiple-choice, choose single answer practice material specifically designed to enhance your performance in this task.

Our Multiple-choice, choose single answer practice material includes a wide range of high-quality questions, carefully curated to simulate the real PTE exam environment. With our free material, you can develop your reading skills, improve your comprehension, and boost your overall confidence for the Reading section. Accessing this valuable resource will undoubtedly give you an edge in achieving your desired PTE score.

Read the text and answer the multiple-choice question by selecting the correct response. Only one response is correct.

The Chinese have a long and rich history of textile production, dating back to over 5,000 years ago. One of their most iconic contributions to the world of textiles is the invention of silk. Silk is a natural fiber produced by the silkworm, a type of moth. The Chinese were the first to learn how to domesticate the silkworm and produce silk thread. This discovery led to the development of a thriving silk industry in China, which quickly spread to other parts of the world.

Silk is a highly prized material for its luxurious qualities. It is soft, smooth, and has a beautiful sheen. Silk is also very strong and durable. These qualities make it ideal for making a variety of textiles, including clothing, bedding, and upholstery.

One of the most popular uses of silk in China is in the making of quilts. Quilts are traditionally made of multiple layers of fabric, sewn together in a patchwork pattern. Silk quilts are prized for their warmth, breathability, and lightness. They are also considered to be very beautiful and luxurious. The Chinese continue to be a leading producer of silk today. They produce over 60% of the world's silk. Silk is an important part of the Chinese economy, and it is also a valuable export product. The invention of silk is a testament to the ingenuity and creativity of the Chinese people. Silk has had a profound impact on the world of textiles, and it continues to be a popular and sought-after material today.

What point is the writer making in this paragraph?

- (a) The Chinese never learned how to produce silk thread.
- (b) Silk is a cheap material that cannot be used for any purpose.
- (c) The Chinese do not have a long and rich history of silk production.
- (d) Silk, a luxurious and historically significant textile, remains in high demand today.

Now that you have a taste of the remarkable free practice material available at PTE Academy, let's explore how this esteemed coaching center can provide you with the support and guidance you need to ace the PTE exam.

Comprehensive Online and Offline Classes:

PTE Academy understands that every learner has unique preferences and schedules. That's why we offer both online and offline classes to cater to your individual needs. Our expert trainers have years of experience in teaching PTE and can provide personalized guidance, strategies, and feedback to maximize your success. Whether you prefer the convenience of online classes or the immersive experience of offline sessions, PTE Academy has got you covered.

5

Read the text and answer the multiple-choice question by selecting the correct response. Only one response is correct.

Australia has a relatively low population density, with around 3 people per square kilometer. This is due to a number of factors, including the country's large size, its arid climate, and its relatively recent history of European settlement.

Most Australians live in coastal cities, with around 85% of the population living within 50 kilometers of the coast. The largest cities are Sydney, Melbourne, Brisbane, and Perth.

The Australian government has a number of policies in place to encourage population growth, including offering financial incentives to immigrants and families. However, population growth has slowed in recent years due to a number of factors, including the rising cost of living and the difficulty of finding affordable housing.

Despite its low population density, Australia is a highly developed country with a strong economy. The country is a major exporter of minerals, agricultural products, and services. Australia also has a strong tourism industry.

Why does the speaker talk about the slowdown in population growth in recent years?

- (a) To highlight the challenges of living in a country with a large population density.
- (b) To emphasize the need for the Australian government to implement policies that encourage population growth.
- (c) To explain the reasons behind Australia's relatively high population density.
- (d) To discuss the impact of Australia's recent history of European settlement on its population distribution.

Our detailed performance analysis provides insights into your strengths and weaknesses, enabling you to focus your efforts on areas that require improvement.

6

Read the text and answer the multiple-choice question by selecting the correct response. Only one response is correct.

Antarctica is home to some of the largest and most impressive icebergs on Earth. These massive blocks of ice can be hundreds of meters thick and thousands of kilometers long. They are formed when glaciers calve, or break off, from the Antarctic ice sheet.

Icebergs play an important role in the Antarctic ecosystem. They provide habitat for a variety of marine life, including penguins, seals, and whales. They also help to regulate the temperature of the ocean by reflecting sunlight back into space.

However, icebergs can also pose a hazard to ships. In 1912, the RMS Titanic struck an iceberg and sank in the North Atlantic Ocean. The disaster resulted in the deaths of over 1,500 people.

Today, icebergs are carefully monitored by scientists and ships are equipped with radar and sonar to help them avoid collisions. Icebergs are a reminder of the power of nature and the importance of protecting our planet. They are a beautiful and awe-inspiring sight, but they also serve as a warning about the potential dangers of climate change.

Which of the following most accurately summarizes the opinion of the author in the text?

- (a) Icebergs are a beautiful and awe-inspiring sight, but they also serve as a warning about the potential dangers of climate change.
- (b) Icebergs are a hazard to ships and should be avoided at all costs.
- (c) Icebergs are an important part of the Antarctic ecosystem and should be protected.
- (d) Icebergs are formed when glaciers calve, or break off, from the Antarctic ice sheet.

Read the text and answer the multiple-choice question by selecting the correct response. Only one response is correct.

Quizzes have long been used as a tool to assess an individual's knowledge and understanding of a particular subject. While they can be a valuable learning tool, it is important to recognize that quizzes do not measure intelligence in its entirety. Intelligence is a complex and multifaceted concept that encompasses a wide range of cognitive abilities. Quizzes typically focus on specific areas of knowledge, such as vocabulary, grammar, or mathematical concepts. While these areas are certainly important, they do not represent the full spectrum of intelligence. Intelligence also involves the ability to think critically, solve problems, and adapt to new situations. These skills are not always easily assessed through traditional quizzes. In fact, some individuals may excel in academic settings but struggle with everyday problem-solving. Overall, quizzes can provide a useful snapshot of an individual's knowledge in a particular domain. However, it is crucial to remember that they do not provide a complete measure of intelligence. Intelligence is a multifaceted construct that encompasses a variety of cognitive abilities.

Why does the speaker talk about quizzes designed to test intelligence?

- (a) To argue that quizzes are not an accurate measure of intelligence.
- (b) To explain that quizzes can be a valuable learning tool.
- (c) To describe the different types of quizzes that are available.
- (d) To provide tips on how to take quizzes effectively.

Read the text and answer the multiple-choice question by selecting the correct response. Only one response is correct.

The Persian wind tower, also known as a badgir, is a traditional Persian architecture feature used for natural ventilation and passive cooling of buildings. These towers have been used in Iran for centuries and are still in use today in many parts of the country.

The badgir works by harnessing the power of wind to create a natural draft inside a building. The towers typically have multiple openings at different levels that allow air to flow in and out. As the wind blows through the tower, it creates a pressure difference that pulls cool air from outside into the building. This cool air then circulates throughout the building, effectively cooling it down.

Badgirs are an effective and sustainable way to cool buildings in hot and arid climates. They do not require any electricity to operate and they can be very effective in reducing indoor temperatures. In fact, badgirs have been known to cool buildings down by up to 12°C (22°F) on hot days.

In addition to their cooling benefits, badgirs also help to improve indoor air quality. By circulating fresh air throughout a building, they can help to remove dust, pollen, and other pollutants. This can be especially beneficial for people with respiratory problems. Badgirs are a fascinating example of sustainable architecture. They are a testament to the ingenuity of Persian engineers and they continue to be a valuable resource for people living in hot climates today.

Which of the following most accurately summarizes the opinion of the author in the text?

- (a) The Persian wind tower's effectiveness is limited by its reliance on wind.
- (b) The Persian wind tower is a versatile and effective solution for natural ventilation and passive cooling, particularly in hot climates.
- (c) The Persian wind tower's modern applications are restricted due to advancements in air conditioning technology.
- (d) The Persian wind tower may not be appropriate for all climates and building types.

Read the text and answer the multiple-choice question by selecting the correct response. Only one response is correct.

Celebrated annually on November 11th, National Education Day in India commemorates the birth anniversary of Maulana Abul Kalam Azad, an eminent scholar and the first education minister of independent India. This day serves as a tribute to his remarkable contributions to the realm of education and his unwavering commitment to shaping a well-educated, progressive India. Maulana Azad's vision for education was deeply rooted in the principles of equality, inclusivity, and universal access. He firmly believed that education was the cornerstone of national development and the key to empowering individuals to reach their full potential. Under his leadership, India's education system underwent significant transformation, with a focus on expanding access to education, promoting multilingualism, and fostering scientific and technical education. National Education Day serves as a reminder of the importance of education in shaping a nation's future. It is a call to action to continue striving towards providing quality education for all, ensuring that every individual has the opportunity to learn, grow, and contribute to society. By honoring Maulana Azad's legacy, we reaffirm our commitment to building a thriving, knowledge-based society where education remains the driving force for progress and transformation.

What is the central idea conveyed in this paragraph?

- (a) National Education Day in India commemorates the death anniversary of Maulana Abul Kalam Azad.
- (b) Maulana Azad's approach to education fell short of promoting equality, inclusivity, and universal access.
- (c) National Education Day serves as a reminder of the importance of education in shaping a nation's future and a call to action to continue striving towards providing quality education for all.
- (d) By honoring Maulana Azad's legacy, we reaffirm our commitment to building a society where illiteracy remains the driving force.

Read the text and answer the multiple-choice question by selecting the correct response. Only one response is correct.

Horseshoe crabs, also known as Limulidae, are ancient marine arthropods that have been around for over 300 million years, predating even the dinosaurs. These fascinating creatures are found along the Atlantic and Pacific coasts of North America and Asia, inhabiting shallow, sandy or muddy bottoms.

Horseshoe crabs are characterized by their distinctive horseshoe-shaped shell, which protects their delicate bodies. They have ten legs, of which the first pair is modified into chelicerae for grasping prey. Horseshoe crabs are filter feeders, using their specialized legs to sift through sand and mud for small worms, crustaceans, and mollusks.

These ancient arthropods play a crucial role in the marine ecosystem. They serve as food for various marine predators, including fish, birds, and shorebirds. Their eggs, which are laid in large numbers along shorelines, are a vital food source for migratory birds. Additionally, horseshoe crabs' blood contains a unique compound called amebocyte lysate (AL), which is used in the manufacturing of medical diagnostics.

Despite their ecological and economic importance, horseshoe crabs face numerous threats, including habitat loss, overfishing, and biomedical bleeding. Conservation efforts are underway to protect these vital creatures and ensure their continued survival in the marine environment.

Which of the following most accurately summarizes the opinion of the author in the text?

- (a) Horseshoe crabs play a crucial role in the marine ecosystem, but they have been overexploited and face numerous threats.
- (b) Horseshoe crab's importance to the environment and the economy is often not understood.
- (c) Horseshoe crabs are found in North America and Asia, and their eggs are a vital food source for migratory birds.
- (d) Horseshoe crab's blood contains a unique compound called amebocyte lysate.
